Sir:

In response to the Examiner's requirement of September 26, 1986, submitted herewith is a bound volume containing each of the patents referred to on pages 2 and 3 in the specification of the above-referenced application and general comments pertaining to the differences between the independent claims and claim 2 and the system disclosed in each of the patents. Each of the patents referred to below is identified by a parenthetical reference following the patent number which corresponds to a tab number in the exhibit book.
